

Federal Highway Administration, DOT

§ 924.7

(5) Persons responsible for administering section 130 at the State level;

(6) Representatives conducting Operation Lifesaver;

(7) Representatives conducting a motor carrier safety program under section 31102, 31106, or 31309 of title 49;

(8) Motor vehicle administration agencies; and

(9) Includes, but is not limited to, local, State, and Federal transportation agencies and tribal governments.

Serious injury means an incapacitating injury or any injury, other than a fatal injury, which prevents the injured person from walking, driving, or normally continuing the activities the person was capable of performing before the injury occurred.

State means any one of the 50 States and the District of Columbia.

Strategic highway safety plan means a comprehensive, data-driven safety plan developed, implemented, and evaluated in accordance with 23 U.S.C. 148.

Transparency report means the report submitted to the Secretary annually under 23 U.S.C. 148(c)(1)(D) and in accordance with § 924.15 of this part that describes, in a clearly understandable fashion, not less than 5 percent of locations determined by the State as exhibiting the most severe safety needs; and contains an assessment of potential remedies to hazardous locations identified; estimated costs associated with those remedies; and impediments to implementation other than cost associated with those remedies.

§ 924.5 Policy.

(a) Each State shall develop, implement, and evaluate on an annual basis a HSIP that has the overall objective of significantly reducing the occurrence of and the potential for fatalities and serious injuries resulting from crashes on all public roads.

(b) Under 23 U.S.C. 148(a)(3), a variety of highway safety improvement projects are eligible for funding through the HSIP. In order for an eligible improvement to be funded with HSIP funds, States shall first consider whether the activity maximizes opportunities to advance safety. States shall fund safety projects or activities that are most likely to reduce the number

of, or potential for, fatalities and serious injuries. Safety projects under any other section, and funded with 23 U.S.C. 148 funds, are only eligible activities when a State is eligible to use up to 10 percent of the amount apportioned under 23 U.S.C. 104(b)(5) for a fiscal year in accordance with 23 U.S.C. 148(e). This excludes minor activities that are incidental to a specific highway safety improvement project.

(c) Other Federal-aid funds are eligible to support and leverage the safety program. Improvements to safety features that are routinely provided as part of a broader Federal-aid project should be funded from the same source as the broader project. States should address the full scope of their safety needs and opportunities on all roadway categories by using other funding sources such as Interstate Maintenance (IM), Surface Transportation Program (STP), National Highway System (NHS), and Equity Bonus (EB) funds in addition to HSIP funds.

(d) Eligibility for Federal funding of projects for traffic control devices under this part is subject to a State and/or local jurisdiction's substantial conformance with National MUTCD or FHWA approved State MUTCDs and supplements in accordance with part 655, subpart F, of this title.

§ 924.7 Program structure.

(a) The HSIP shall include a data-driven SHSP and the resulting implementation through highway safety improvement projects. The HSIP includes construction and operational improvements on high risk rural roads, and elimination of hazards at railway-highway grade crossings.

(b) The HSIP shall include processes for the planning, implementation, and evaluation of the HSIP and SHSP. These processes shall be developed by the States in consultation with the FHWA Division Administrator in accordance with this section. Where appropriate, the processes shall be developed cooperatively with officials of the various units of local and tribal governments. The processes may incorporate a range of procedures appropriate for the administration of an effective HSIP on individual highway systems, portions of highway systems,
